# THE SPIRIT OF VERMONT

## Address of Judge Wendell P. Stafford Delivered at the home on the West hill road Friday Annual Dinner of the Greater Vermont Association in Montpelier July 12

their state, as some appear to think, just because it is theirs—just because it produced them. Of course a man should be devoted to his state. A man should be devoted to his parents, because he is their son; but whether he may be proud of them depends on other things, Every state, I suppose, has something to be proud of. To the making of each there went some toiling courage, some devotion to high prin me cheerful sacrifice for those that should come after; and of these men should be proud. But when we speak with pride of territory and popu-lation, overflowing harvests, exhaust-

less mines, luxurious citics, we talk like children, who are proud of clothes What Vermont has contributed to the upbuilding of the nation has been a favorite theme. Figures have been arrayed to prove that out of all pro-portion to her size and wealth she has had her hand in business, in war, in studies and professions, in making and execution of the laws. Her vigorous blood has made its pulse felt through all the arteries of the republic; and it is there you must look to find the greater Vermont in our first century and a quarter of statehood. We would not have had it otherwise. And yet we cannot help wondering what Vermont would have been like if all this energy and intelligence had been kept at home. Some loss there might have been. Some never would have come to their full stature here for lack of opportunity. And here at home struggle for survival, Yankee against Yankee would have been fierce indeed. But when all allowances have been made, who can doubt that we should have seen here a development to challenge the attention of the world? Something like that is what we dream of for the future. The ery is no longer, West-ward Ho! but Vermont for Vermont-

ers. Earnest men are saying, "Here be-tween the Bay state and the province, between the long, bright river and azure lake we will build a greater Vermont!" Greater in what? That is the ques tion to be asked and answered whenever we are met as we are now. Greater, of course, in a fuller development of all her natural resources. We mean that every mine should give up its treasures, every quarry open its prime-val corridors to the sun; that every sleeping giant in our unused water course shall be awakened and put to work; our forests shall be fended; our fields shall be fed, that they in turn may feed the coming generations. We mean to be husbands and not ravishers of the land, that her fruitful womb to make this labor so attractive that the children will not be lured away, as the fathers were, but turn eager eyes and hands to the realm

around their doors, We mean to knit and lace the state together with the best rondways in the world-ronds that feel like velvet and stand like adament, and look like a rich brown ribbon in the shade and And over these shall come seekers

scenery. Here is that beauty that may be a joy forever. Here is that wealth that can never be spent but by our

We mean to do all that can be done to make our public school plan perfect, from the lowest to the highest rounda ladder whose foot shall rest on the doorsill of the humblest cottage, while its top is in the university.

And, better still, we mean to put the whole community to school by a new application of the old principle of demore complete fulfillment of the fathers' purpose — government by the people. We mean that every neighborhood shall be a civic center, every schoolhouse a forum where men and women shall gather for the discussion of the public needs. That is the idea that has taken hold — almost a religious hold — upon the minds of progressive men through all the mighty

"Make wide the doorway of the school Around whose sill the millions wait-The cradle of the common rule, The forum of a stronger state.

Make broad the bar, and bid appear The questions clamorous to be tried And let the final judges hear, Themselves the causes they decide.

Whatever channels lead apart
The currents of the lives of men,
The blood that left the common heart Shall leap with common pulse again,'

It has been well said that for the first hundred years of our history the emphasis was laid on freedom—hereafter it shall be laid on naity. And so "Freedom and Unity," the great legend on our shield, is both history and peoplecy. We shall be united in the venes to come as we never were be fore; and out of common counsels shall come better law, and better adminis-tration of the law. We want the best wherever we can find or borrow it. In our courts we want the simplest forms of procedure consistent with the preservation of legal rights, the speediest trials that fairness can permit, and the promptest decisions, provided only and always that they be well weighed. We hope to put an end to frivolous appeals and to the granting of new trials and to the granting of new trials where the result was right before. We where the result was right before. We where the result was right before and of pure-bred cattle in South was right before. We where the result was right before. We mean to make it possible for the poor-at suitor to have his case tried by competent counsel, even if in such cases, the state must provide a public prosecutor; and we mean to make it impossible for the richest litigant to tire his adversary out and rob him by

To do all this we must have our ablest men in office, not only to make but also to interpret and execute the iaws. And we shall send to Washing.

Some bacteria can live in water at a ton not necessarily those who wish to temperature approaching the boiling point. go, but those the nation will have need. They are, therefore, called thermophyles.

### CO-OPERATIVE CATTLE SALES.

### Good Prices in Home Markets Encourage Raising Pure-Bred Stock.

been successful in increasing the number of South Carolina farmers who feed out cattle during the winter. These sales, the first of which was held two years ago, have furnished proof, it is said, that if they can be proof, it is said, that if they can be proof, it is said, that if they have the sales and the sales and the sales are sales, the first of which was held two years ago, have furnished proof, it is said, that if they can be proof, it is said, that if they can be proof, it is said, that if they can be proof, it is said, that if they can be proof, it is said, that if they can be proof, it is said, that if they can be proof, it is said, that if they can be proof, it is said, that if they can be proof, it is said, that if they can be proof a market when they have the said and make the sa

is then set so that each farmer knows her brother, John Blood, in Alstead, N. when he begins to feed his cattle the H. Mr. Blood while having was thrown time at which they must be ready for from a load and struck on his head

then he begins to feed his eattle the time at which they must be ready for market. The feeding is done with this date in mind. The day of the sale is announced through letters, newspapers, etc., and every effort is made to at tract as large a number of huyers as possible. As a matter of fact, the day is smally a gala occasion and farmers come in from a wide radius.

The sale itself is conducted in much the same manner in which eattle are sold in the large markets. This year cattle were sold in two places, a total of 265 being disposed of. These average of 265 being disposed of. These average is cold in the large markets. This year cattle were sold in two places, a total of 265 being disposed of. These average of season and sold for an average of \$6.39 per cattle were sold in two places, a total of 265 being disposed of. These average is cold in the large markets. This year cattle were sold in two places, a total of 265 being disposed of. These average of season in the large markets. The fact that steers raised in South Carolina could sell for \$125 a head in a home market made a distinct impression on the farmers present. The other prices and weights also averaged higher than last year. This is regarded as condition.

An introduced pounds, the top price was 9 cents a pound, which was brought by a hunch of seven head of steers averaged higher than last year. This is regarded as condition.

Rev. T. J. Poelman of Boston who understance and weights also averaged higher than last year. This is regarded as condition.

Tommy a builded owned by Harold Bugbee, was badly injured by an author of the sale is paralyzed. He is in a critical and condition.

Luther Neiman and Miss Margaret begg of White Plains, N. Y., came Sat trade in a critical and evening the condition.

Madam Bradley, Mrs. 1. C. Bradley and son, 1. C. Bradley, ir., went and semily their sum and until school opens. Its. Bradley will return home in a streat was to sum any the days.
